

Welcome to your new MacBook

McKinnon Secondary College

This Mac is yours to look after for the rest of the year. Here's a few quick things worth knowing.

BATTERY CARE

- It's fine to leave it plugged in overnight – the battery management system prevents overcharging.
- Try to avoid regularly running it down to empty; a rough range of 20-80% is easier on long-term battery health than full cycles.
- If it won't hold charge like it used to, get in touch with IT rather than waiting for it to get worse.

APPLECARE+ COVERAGE

This device is covered under the College's AppleCare+ plan, which includes accidental damage cover (excess fees may apply) and priority hardware support. If you drop it, spill something on it, or crack the screen, report it to IT straight away rather than waiting.

GETTING SUPPORT

If anything is wrong with the Mac itself, or something set up during enrolment doesn't look right, contact IT:

ithelp@mckinnonsc.vic.edu.au

Please mention this device's name so IT can look it up quickly.

--- EXAMPLE FILE ---

This is a placeholder for testing mck-onboarding.sh. Swap it for the real thing before this goes out to actual devices.
